In less than a week she has practically swept the Chinese navy from the seas, has destroyed two of their best battleships and three new armored cruisers, sunk the fastest transport in the China service, captured one of the men-of-war convoying it, scattered the reat of the fleet, and has already apologized to Great Britain for not having noticed the triffing circumstance that the transport was flying the British flag.

There is something in the promptness and effectiveness of the Japanese movements which recalls the Prussian operations against France in 1870 and against Austria in 1866.

It is real war, and it means real news, and the news may be looked for in the editions of "The Evening World."
